Sister Bay, WI 54234

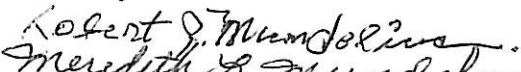

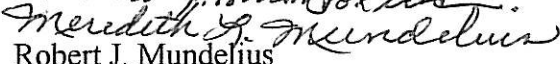

Dear Sir,

Within the past year or so, you announced plans to up-grade and repave Isle View Road. Until recently, I assumed that would automatically include Northern Door Road, which has, to my knowledge, always received maintenance and improvements concurrently. It is, essentially, a continuation of Isle View Road to the established turn-around, one-half mile to the south.

The Northern Door Road pavement is about sixteen feet in width at most locations, and meanders, somewhat, through the 50 foot right-of-way. Its condition is similar to that of Isle View, not surprising since it's the same age, and handles a large proportion of its heavy traffic, including construction and service vehicles. It should be noted that there are about 25 homes that front on this road. This would, realistically/hopefully, include shaping a shoulder several feet in width to protect the pavement (drainage), improve safety (pedestrian and vehicle escape) and allow convenient maintenance (sickle blade mowing).

Please consider repairing our road in conjunction with the Isle View Road project. Economically, it would avoid a large mobilization cost if our segment were left to be done in the future. Thank you.

Sincerely,

Robert J. Mundelius
